National Emergency Management Plan (NEMP)

Guidelines & Instructions

1 NEMP Rationale

Having an approved National Emergency Management Plan (NEMP) for a Country Office offers several operational benefits:

1. Planning and Preparedness: The NEMP is a vital component of an office's disaster planning and preparedness.

2. Action Guidance: It serves as a clear action plan for the office during a disaster event.

3. Effective Communication: The NEMP facilitates effective communication of the emergency response plan to the ADRA Network, the Seventh-day Adventist church, associated institutions, national and local government authorities, as well as key partners and stakeholders.

4. Efficient Response: It enables a timely, cost-effective, and efficient initial response to a disaster event.

5. Operational Presence: The NEMP helps the office quickly establish operational presence, potentially attracting additional funding.

6. Local Capacity-Building: It supports local engagement by building the capacity of local partners in NEMP development, allowing the office to tailor plans to their unique situation.

As for for which Country Offices are required to have an approved NEMP, all ADRA Accredited offices are mandated to have one, unless their governing Board formally exempts them. ADRA/I EMU should be informed of such exemptions, as specified in the EM Ops Manual.

Additionally, offices with an approved NEMP enjoy the advantage of pre-approval for funding for initial responses up to $20,000 USD, provided the response aligns with the NEMP's plan. This streamlines the response process and eases the workload on staff during emergencies.

2 Developing the NEMP - A Participatory Process

To ensure effective emergency preparedness, it's crucial to involve a diverse team rather than relying on one individual. The National Emergency Management Plan (NEMP) should be a collaborative effort. We recommend forming an interdisciplinary team right from the beginning to oversee NEMP development, with a designated ADRA staff member leading this team. Their primary responsibility is to guide and supervise the NEMP's creation.

This team doesn't have to consist of the same staff who will execute the plan during an emergency, but their input can be valuable. The NEMP's development should involve consultations with experienced ADRA staff, key partners, stakeholders, and external entities like national and local governments, UN partners, cluster leads, embassies, and other NGOs.

When developing the NEMP, consider the following approach:
1. Appoint one person to manage the NEMP's development, setting a clear timeframe for completion.
2. This manager can delegate specific sections of the NEMP to relevant team members. For instance, finance experts can handle the budget section.
3. If your region has an Emergency Coordinator, collaborate with them and seek guidance as needed.

3 NEMP Approval Process

The approval process for a National Emergency Management Plan (NEMP) involves several key steps:

Initial NEMP Approval:
a) The NEMP is submitted to the Regional Office/ADRA I EMU for review before being submitted to the Country Office Board for approval. It's crucial that the Board understands that by approving the NEMP, they commit to providing local matching funding of
$3,000 for each emergency response under the NEMP.
b) The Board-approved NEMP is then sent to the Regional/Division Office (RDO) for approval by their ADCOM and then to ADRA International for ADCOM approval. Only after obtaining approval at all three levels is the NEMP fully approved for activation. The reason for approval being required at three levels is that each entity is making a financial commitment when a NEMP intervention is activated i.e. in essence they are approving in advance the proposed interventions.

Annual or Post-Activation Review:
The NEMP must undergo a review and update either annually or after activation to incorporate lessons learned. If the changes are minor, such as staff and stakeholder contact updates without altering intervention content, an updated copy is shared with the Country Office Board, RDO, and ADRA I EMU for acknowledgment.
Note: Each intervention should serve a minimum of 75 households, with at least 67% of costs allocated to relief aid and a maximum of 33% for supporting expenses.

If the changes are significant, like alterations to the interventions provided or notable shifts in country risks (e.g., civil unrest or war), the revised NEMP must follow the same approval process as a new NEMP.

Five-Year Review:
Every five years, a major review of the NEMP takes place, requiring a formal re-approval process as described in point #1. This review is conducted by the Country Office with guidance from the Senior Manager for Emergency Preparedness at ADRA I EMU. It's advisable to initiate the major NEMP review at least three months before its expiry date to ensure completion before the five-year deadline. NEMPs that have passed the five-year expiry deadline (from the date of local board approval) will not be eligible for activation.

In summary, the NEMP approval process involves three levels of approval - Country Office Board, Regional Office, and ADRA International - to ensure financial commitment alignment with proposed interventions during NEMP activation.

I Activating the NEMP

1. Meaning of "Activating the NEMP":
Activating the NEMP signifies that the Country Office is requesting to initiate a response per one of the approved NEMP menu responses to an emergency event that aligns with the NEMP's approved criteria. This eliminates the need to prepare an initial response budget and proposal during the critical aftermath of an emergency.

2. Activation Criteria:
The NEMP contains criteria for activation, including global standards and local office-specific criteria. If these criteria are met, the NEMP can be requested to be activated.

3. NEMP Activation Process:
To activate the NEMP, the Country Office's emergency focal person(s) assess the situation. They complete the NEMP Activation Notification form, sending it to EMU at ADRA/I with copies to the Regional Office. The SitRep and bank account details must accompany the Activation form. If approved, the selected intervention is then executed following the NEMP guidelines.

4. Post-Activation Requirements:
After formally activating the NEMP, the chosen intervention must be implemented according to the NEMP's specifications. All costs, beneficiary information, and distribution records must be meticulously maintained. Photographic documentation illustrating ADRA's involvement is essential. Implementation should conclude within 60 days of intervention approval, and a final report must be submitted to EMU at ADRA/I (with a copy to the regional office) no later than 30 days after intervention completion.

5. Lack of an Approved NEMP During a Disaster:
If an ADRA Accredited office doesn't have an approved National Emergency Management Plan (NEMP) and needs funds for an initial emergency response (up to $20,000 USD), they must create an initial response proposal using ENET templates and gain approval from ADRA/I's EMU before implementation.

5 Scaling-up the NEMP

For Category 2 or 3 disasters, NEMPs can be scaled up to a higher budget based on the humanitarian need, country office capacity, and funding availability, collectively decided by EMU and the Regional Office. This entails increasing the budget for one of the NEMP interventions to align with the available funds. Three key factors determine the scale of the NEMP: the affected population's needs, the Country Office's capacity (potentially enhanced by ERT deployment), and available funds.

Process of Scaling-up:
Once the available funding is determined, the budget for the selected NEMP intervention is proportionately increased to match the funding. Some budget lines may vary due to economies of scale, such as reduced transportation costs for larger quantities of goods. EMU at ADRA/I reviews and approves the scaled-up intervention and budget before implementation.

Documentation for Scaled-up NEMP:
For scaled-up NEMP responses up to $100,000, the following documents are required:
a) Approved NEMP
b) Revised budget for the agreed value (Network Proposal budget template)
c) Current SitRep (ADRA-approved template)

For scaled-up NEMP responses exceeding $100,000, a full external audit report must be submitted as well.

Reporting for Scaled-up NEMP:
Reporting requirements for all scaled-up NEMP responses are the same as those for Network Projects.

6 Updating the NEMP

Ideally, the National Emergency Management Plan (NEMP) should be a dynamic, continuously evolving document, updated as needed. However, at a minimum:

Sections with orange headings, which contain information likely to change within a year, should be updated annually. All other sections should undergo review once every five years.

National Emergency Management Plan: ADRA Honduras

Context and Risk Analysis

1.1 Known Natural Hazards (rapid and also slow onset disasters) - Please insert additional rows if needed

This is a brief analysis of the dangers to which your country is exposed, based on data available locally and on the Internet.
Natural hazard: a natural phenomenon that can affect communities and the human environment, for example, a cyclone, earthquake or volcano.
Exposure/Frequency: when this phenomenon may occur (exposure) and how often (frequency). Examples: 1) cyclones occur during the cyclonic season (e.g. November to April) and affect the country once every three years on average; 2) earthquakes can occur at any time and, on average, a major damaging earthquake occurs every 50 years.
Location: in which parts of the country do known hazards usually affect?
Background: provide 1 or 2 examples of recent major disasters caused by the identified hazard. Note: a map showing where these hazards are prevalent in your country should be included in the Appendices section.

Number	Hazard Type	Exposure/ Frequency	Location	Past History of Disasters
1	Flooding	June - Nov	Atlántida, Colón, Cort	Beta and Gama in 2005
2	Cyclone/Hurricane/Typhoon	June - Nov	Atlántida, Colón, Cort	FIFI, in 1974
3	Earthquake	Any Time of	Choluteca, Valle, Atla	MITCH, Oct. 1998
4	Drought	January-	Valley, El Paraiso, Olan	Agatha and Mathew, May 2010
5	Disease	Any Time of	the whole country is a	Tropical Storms Eta and Iota

Note: *The above identified hazards can be visualised on the country map in the Appendices*

1.2 Man-Made Disasters (Past, Present or Anticipated - Include Conflict Situations) - Please insert additional rows if needed

Number	Risk factors, root causes, triggers (e.g., elections, ethnic tensions, political instability, civil disturbances, etc.)	Date	Location (province, c	Reported impact (deaths, economic costs, etc.)
1	Forest or urban fires due to the action of criminal gangs	2012	Urban: Tegucigalpa, San Pedro Sula and La Ceiba. Fire	More than 5,000 families affected, US$25 million in economic losses and 30,000 hectares lost.
2	June 28, 2009: Political instability causing internal conflicts (political coup).	2009	Throughout the country, especially in Tegucigalpa, San Pedro Sula and La	More than 100,000 people displaced, especially those belonging to socialist political parties.
3	Regional migration crisis	2020-2024	Choluteca, Cortés, Ocotepeque, El Paraiso	After the Covid19 pandemic, a mixed monthly migratory flow of about 11,000 personnel transits Honduras. Many of these people have humanitarian needs that require urgent attention.

Note: *The above identified hazards can be visualised on the country map in appendix number:*

Resources Analysis

2.1 Additional Staffing Capacity from Partners and Volunteers

Relationships already in place with partners, church volunteers, SDA organisations, health organisations, that can bring additional expertise and capacity

To meet staffing needs, offices often establish relationships with other organizations. For this reason, it is vital that relationships with partners are continually maintained. Please complete the following

information in the NEMP:
a. List organizations and partners that can provide additional staffing capacity if needed.
b. Indicate the type of agreement with the partner. It may be an MOU (memorandum of understanding), standing agreement, ad hoc, contractual, etc. Attach a copy of the agreements.
c. Indicate the organization's primary area of expertise.
d. Full details of the contact person in the organization.

Organization	Type of Relationship/Partnership	Expertise/Capacity	Contact's Name	Contact's Phone	Contact's Email
Adventist Church	Memorandum of Understanding (MoU)	Volunteering	Pastor Otoniel Rodriguez	5049906-9031	jacentral@adventist.hn
Adventist Church	Memorandum of Understanding (MoU)	Volunteering	Pastor Luis English	5049961-0336	jaunion@adventista.hn
Adventist Church	Memorandum of Understanding (MoU)	Volunteering	Pastor Javier Brooks	5049450-2462	jacomayaguela@adventistas.hn
Adventist Church	Memorandum of Understanding (MoU)	Volunteering	Pastor Bryan Towers	5049921-5908	janoroccidente@adventista.hn

2.2 Coordination Arrangements

Partnerships should be established well in advance of an emergency. Establishing clear coordination mechanisms in advance of an emergency is critical to an effective humanitarian response. The existence of government clusters/working groups/forums for planning and preparedness varies from country to country. Once the clusters/working groups have been identified, decide in which Sector/Cluster/Group ADRA will participate. This decision should be based on the prior experience, qualified personnel and capacity of the respective clusters/groups that ADRA decides to join. It is vital that ADRA participate regularly in cluster/working group meetings, both before and during an emergency response.

Complete the following information in the NEMP:
a.Identify and list the Cluster/Group: Provide information only for the working clusters in your country. If there are other clusters, add them in the "Other" line. b.Lead Agency: Indicate which organization is leading this cluster/working group in your country, e.g. UNHCR, WHO, etc.
c.Enter the details of the meetings and who from ADRA is primarily responsible for attending the meetings.
The fundamental principle of this section is that all ADRA offices should know and understand the response and coordination mechanisms for emergency response within their country and engage with key stakeholders before a disaster strikes.

Cluster, Government, Working Groups/Platform	Lead Agency	Does ADRA attend meetings?	Frequency of meetings	Staff Member Representing ADRA	Notes/Comments
WASH Cluster	UNICEF	Yes	Monthly	Edwin Mejia	
Protection Cluster	UNICEF	Yes	Monthly	Jesus Manueles	
Education Cluster	UNICEF	Yes	Monthly	Elena Castillo	
SAN Cluster	WFP-FAO	Yes	Monthly	Jesus Manueles	
CCCM Cluster	IOM	YES	Monthly	Jesus Manuele	

Sub Cluster Cash Transfer		PMA	YES	Monthly	Jesus Manuele
Nutrition Cluster		UNICEF	YES	Monthly	Veronica Velas
EHP Communication Group		EHP	YES	Monthly	Jesus Manueles
Other:					
Other:					
Other:					

3. Response Plan

3.1 Response Criteria

Each ADRA office should know and understand the response and coordination mechanisms for emergency response within their country. The purpose of this section is to identify what the initial triggers (criteria) are for activation of the NEMP. This section identifies the criteria that must be met for plan activation. These criteria are divided into two categories: those identified by the ADRA country office and those required by ADRA International. The criteria required by ADRA/I have already been introduced in the NEMP. The criteria determined by the CO will be specific to that CO only. For example, the office may decide to respond only to emergencies occurring in certain parts of the country.

ADRA	HONDURAS will respond to an emergency when the following criteria are met:
1	At least 2,000 people have been directly affected.
2	The Humanitarian response will provide assistance to at least 200 families who were directly affected.
3	The emergency occurred within the last 48 hours in the case of sudden-onset events (earthquakes, hurricanes, etc.) and at any time in the case of slow-onset events (droughts, etc.). The total
4	budget available is $25,000 USD, with contributions from ADRA International ($14,000), ADRA Inter-America ($8,000 USD) and the local Union ($3,000 USD).
5	There are trained, qualified and available personnel to be mobilized to the emergency area to coordinate the response. The
6	affected population has needs aligned with one of the response scenarios.
7	The emergency occurred within the national territory.
8	Humanitarian assistance will not duplicate actions with other humanitarian organizations in the field.

3.2 Rapid Needs Assessment (RNA) Plan

An ERN provides information on which to base decisions to ensure that the best assistance is provided to those most in need at the right time. To do this, an office should plan an RNA in advance. It should be kept in mind that, whenever possible, joint needs assessments with other agencies involved in the emergency response are preferable to avoid duplication and inconvenience to the community and to reduce costs.

RNA Tools Available	1) For primary data survey: ADRA Rapid Needs Analysis Form complemented with t h e national EDAN Format approved in Honduras by COPECO. 2) For secondary data collection: reports from Government (COPECO), Civil Society Organizations, UN Agencies, etc.
Timing of Needs Assessment	Assessment will begin within 24 hours for sudden-onset or sudden-onset disasters. At any time for slow onset disasters.

Needs Assessment Team Members	**Name**	**Role(s)**
	Jesús Manueles, Allan Méndez, BelkisResponsible Coordinate	: Jesús Manueles (gather information, contact local authorities in Rodriguez, all emergency committees CODEMS, and COPECO officials). all CODEMS emergency committees, and COPECO officials). Volunteers, and Adventist Organizations. Belkis Rodriguez: Write reports, graphs, tables, keep track of updated information and the transalation process.

Needs Assessment Processes	The NEMP will be activated based on secondary data (CAT 1 emergencies according to ADRA classification criteria) and primary data (CAT 2, 3 and 4 emergencies). In the latter case, ADRA Honduras will dispatch a team to the affected area within 24 hours of the emergency to conduct the assessment. The primary data needs assessment process will follow these steps: -Visit to the affected area by the assessment team with the support of volunteers and in coordination with municipalities' representatives (CODEM - Municipal Emergency Committee). -Information gathering through observations, interviews with key informants (affected population, government agencies, civil society, etc.) and focus groups representative of the communities. Participation in inter-institutional coordination meetings that are already operational. -Data analysis. -Preparation of the evaluation report.
Needs Assessment Report	For CAT 2, 3 and 4 disasters, ADRA Honduras will deliver the first assessment report within 72 hours of the disaster or at any time in the case of slow-onset disasters. The report will be made using the format provided by the ADRA Regional Office. The report will include: number of people affected, communities and localities affected, type of damage occurred and needs required, information separated by gender and age whenever possible, actions taken by the government and other NGOs to identify gaps or unmet needs, among others.

National Emergency Management Plan: ADRA Honduras

3.3 Personnel Resources for the National Emergency Response Team (ERT)

To enable an effective and coordinated response, ADRA has developed a management tool known as the Emergency Response Management System (ERMS). Before an emergency occurs, the best qualified staff members are assigned to each of the functions identified in the ERMS structure. Based on this assignment, staff members can be upgraded for their assigned role.

Complete the table by identifying the function(s) that could be assigned to staff members within the ERMS structure and any specific technical competencies that staff members have.
*The functions of the ERT are: Communications, ERC, Finance, Finance, HR, Logistics, Planning, Programs, REC, Safety and Security, and PSS Support.

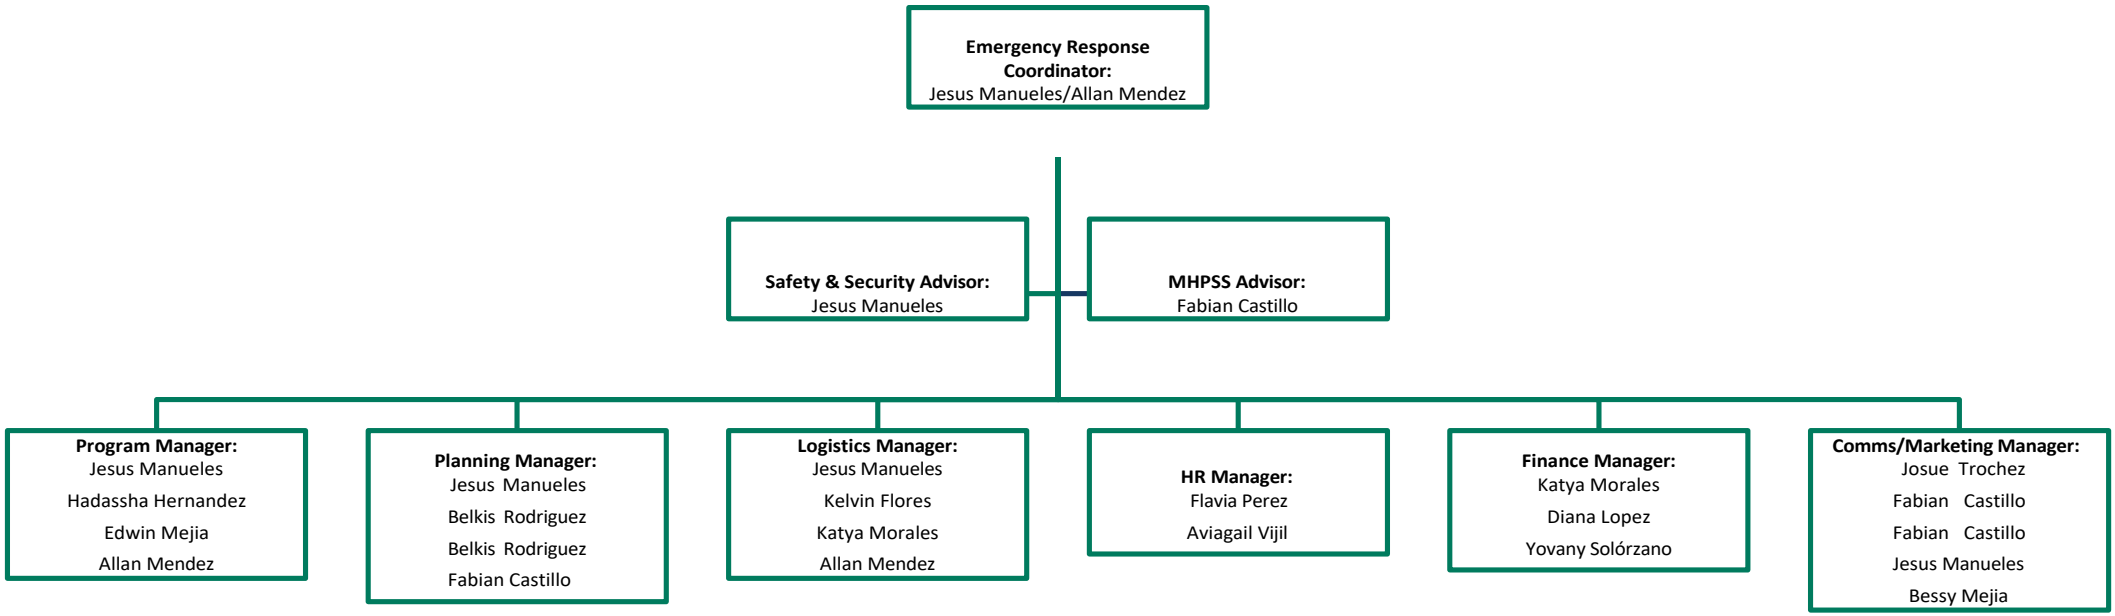

Please refer to the EM Operations Manual for a full ERMS organization chart and job descriptions.

NEMP Scenario Guidelines

Development of Intervention Scenarios:
Each Country Office must formulate a maximum of three intervention scenarios, akin to pre-approved mini-proposals for initial responses.
Each scenario must address a singular sector, with Scenario 1 specifically designated for CVA (Cash Voucher Assistance).

Adherence to Approved Interventions:
Deviating from the intervention approved in the NEMP (National Emergency Management Plan) necessitates completion and approval of an initial response budget and proposal.

Implementation Duration:
Scenarios must be implemented within a maximum period of 60 days, although they are typically executed over shorter durations.

Submission of Final Reports:
A final report from the Country Office is mandatory within 30 days of the project's completion.

Scalability of Interventions:
All interventions must be scalable to accommodate varying needs and circumstances.

Selection Criteria:
Intervention choices should leverage the existing strengths and expertise of the Country Office.

Budgetary Allocation:
The total budget per intervention is capped at USD$20,000, unless specified differently by a regional office. The allocation breakdown is as follows:
$14,000 from ADRA International.
$3,000 from the Regional Office.
$3,000 from the Country Office or local Union.

Other Costs and Overheads:
Total Other Costs should not surpass one third of the intervention's total value. Any savings should be redirected to increase the beneficiaries. The total material/services costs that go directly to beneficiaries should account for at least67% of the total project budget. The maximum overhead chargeable to the budget is 5% of total direct costs.

Minimum Beneficiary Reach:
Each scenario must provide assistance to a minimum of 75 households.

National Emergency Management Plan: ADRA Honduras

Intervention Scenario #1		Type of Intervention: Cash
1	Description of what may cause the need for the intervention	Cash transfers can be provided to facilitate access to essential goods and services for people affected by disasters as well as to support their early recovery efforts. This type of assistance can be provided in response to any type of disaster, whether sudden or slow onset, man-made (war, chemical disasters, etc.) or natural (hydrometeorological, geodynamic, sanitary, etc.).
2	What assistance will the affected population receive?	ADRA will make multipurpose money transfers. The amount of the transfer will be $80 dollars according to the recommendation of the Honduran Cash Transfer Group. These transfers are intended for families with 5 members, and are intended to help cover their humanitarian needs for 1 month. Whenever possible, a proportional scale will be applied according to the number of members.
3	Beneficiaries: Number, selection criteria, registration	The project will assist 225 families (1,125 people). Assistance will be provided to families whose community was affected by the adverse phenomenon, with special attention to the elderly, single mothers, and p e o p l e who are disabled or belong to vulnerable groups. The list of beneficiaries will be prepared in advance following these criteria with the local authorities' emergency personnel, community leaders and volunteers on the ground. The distribution list will record the names and identification number to guide the distribution process and avoid duplication. Facilitate access to essential goods and services through the distribution of cash assistance to 225 families (1,125 people) [Indicator C1 & C5)
4	Intervention objective and indicators	We will need people to carry out the quotation process with financial service providers. Field staff will also be needed to assess the needs and prepare all the logistics for the distribution process, as well as drivers, staff and volunteers for the day of distribution. For this type of intervention it is estimated that at least 10 people from the ADRA Honduras team will be directly involved in the implementation of the project. On the other hand, it is estimated that at least 20 volunteers will support in the activities of organization, list control, verification of the adoption of biosecurity protocols, among other relevant activities.
5	Human resources required for the intervention	ADRA will conduct a market analysis using the tools in the NEMP Response Scenario Cash Transfer Guidance for NEMP Response Scenarios developed by the ADRA Network's CASH TLL.
6	Identify steps to be taken to ensure market functionality	For security, availability and speed, we use banks and credit unions.
7	Likely service providers for cash transfers	The default delivery mechanism for assistance will be through the delivery of cash in an envelope. However, ADRA may choose different mechanisms to deliver cash: 1) bank transfers, 2) checks, 3) gift cards, 4) telephone transfers (mobile money).
8	Identify the delivery mechanism for the transfer of cash	1) Record with the beneficiary's full name and identification number, and signature of receipt. After the distribution activities are completed, ADRA will conduct a post-distribution monitoring exercise to measure the impact of the project. Depending on the resources available and the operational context, the exercise may be carried out through different methodologies (focus groups, individual interviews based on random group sampling, etc.).
9	Identify security measures if actual cash is distributed	The request for activation of the NEMP will be made within 48 hours of the emergency (sudden events). Distribution activities will commence within 7 days of approval of the NEMP activation request. The project will last a maximum of 30 days from the NEMP approval date on the activation form. The project start and close date may be modified in the event of delays in the remittance of ADRA DIA and ADRA-I funds. The final project report will be submitted to ADRA IAD within 30 days of the project completion date on the NEMP activation form.
10	Intervention timing: duration, how soon after the disaster	

National Emergency Management Plan: ADRA Honduras

National Emergency Management Plan: ADRA Honduras

Intervention Scenario #2		Type of Intervention: WASH
1	Description of what may cause the need for the intervention	Man-made disasters (conflict, chemical, etc.) or natural disasters (geodynamic, hydro-meteorological, sanitary, etc.), whether sudden or slow-onset, can create gaps in access to personal hygiene items. When the delivery of cash assistance and/or vouchers is not possible because markets cannot supply these items to the affected population, ADRA will activate this scenario to facilitate access to these items.
2	What assistance will the affected population receive?	ADRA will distribute a personal hygiene kit in accordance with SPHERE Standards (WASH Technical Chapter, Standard 1.2) and calculated to cover the hygiene needs of a family of (5) members for one month. The volume and quantity per item are described in the quotation. ADRA may make modifications to the standard composition of the kit according to the context, local market availabilities and cultural preferences of the affected population as indicated in the Sphere Manual Hygiene Promotion Standard 1.2 Key Actions.
3	Beneficiaries: Number, selection criteria, registration	210 families of 5 members (1,050 people in total) will receive hygiene kits to alleviate their needs for one week. Assistance will be provided to families whose community was affected by the adverse phenomenon, with special attention to the elderly, single mothers and people who are disabled or belong to vulnerable groups.
4	Intervention objective and indicators	Facilitate access to 210 families (1,050 people) affected to personal hygiene items to ensure their well-being, dignity and health for one month (Indicator W3).
5	Human resources required for the intervention	Individuals will be needed to perform needs assessment reports, budgeting and purchasing, as well as packing tasks in our warehouse. People will also be needed to support and assist during distribution at the selected site. Some of these human resources will be provided through our volunteers and others will be hired only for the days needed for the intervention. For this type of intervention it is estimated that at least 10 people from the ADRA Honduras team will be directly involved in the implementation of the project. On the other hand, it is estimated that at least 20 volunteers will support the activities of delivery, packaging, storage and distribution of humanitarian aid.
6	Identify steps to be taken to ensure market functionality	ADRA will conduct a market analysis using the tools in the NEMP Response Scenario Cash Transfer Guidance for NEMP Response Scenarios developed by the ADRA Network's CASH TLL.
7	Packaging & warehousing arrangements	A list of all beneficiaries with their full name and identification number will be provided in advance. This information will be used to determine the exact quantity for purchase, as well as packaging and loading. Items will be packed in sturdy bags or boxes made of eco-friendly materials (with the ADRA logo on the inside so that they are visible). We will hire workers to assist in this process, as well as use volunteers to expedite packing at ADRA's warehouse in Tegucigalpa.
8	Transport arrangements	ADRA Honduras will drive 3 4x4 vans to distribute these goods to the target areas. The goods will be delivered in small quantities in each area to avoid having a massive number of people in the same place at the same time to avoid disorder and damage. The goods will be covered to protect them from rain and to avoid attracting people's attention when driving through the neighborhoods. To maintain order, only those persons whose names are on the list will be attended to and assisted personally.
9	Distribution procedures	ADRA Honduras will coordinate this response with COPECO (Comité Permanente de Contingencia Nacional) authorities, municipal authorities, local pastors and pathfinder volunteers, as well as the local police department, to ensure the safety of all involved during the distribution activity and complementary assistance. People will be assisted in their different locations (neighborhoods and shelters). The names of beneficiaries will be provided in advance by local leaders, authorities and volunteers. When goods are distributed, people will be assisted according to the list provided; names and ID numbers will be checked and crossed out to avoid duplication. Each person will sign next to his or her name to retain proof of this application.
10	Intervention timing: duration, how soon after the disaster	The request for activation of the NEMP will be made within 48 hours of the emergency (sudden events). Distribution activities will commence within 7 days of approval of the NEMP activation request. The project will last a maximum of 30 days from the NEMP approval date on the activation form. The project start and close date may be modified in the event of delays in the remittance of ADRA DIA and ADRA-I funds. The final project report will be submitted to ADRA IAD within 30 days of the project completion date on the NEMP activation f o r m .

National Emergency Management Plan: ADRA Honduras

Intervention Scenario #3 **Type of Intervention:** Food

1	Description of what may cause the need for the intervention	Man-made disasters (conflict, chemical, etc.) or natural disasters (geodynamic, hydro-meteorological, sanitary, etc.), whether sudden or slow-onset, can create gaps in access to food. When the delivery of cash assistance and/or vouchers is not possible because markets cannot supply these items to the affected population, ADRA will activate this scenario to facilitate access to these items.
2	What assistance will the affected population receive?	ADRA will distribute a food kit in accordance with SPHERE Standards (Food Security and Nutrition Technical Chapter, Standard 6.1) and calculated (NUTVAL Calculator) to cover the food needs of one person for 4 weeks (28 days) or a family of (4) members for 1 week (7 days), taking into account the 2,100 Kcal, volume and quantity per item described in the budget. ADRA may make modifications to the standard composition of the kit according to the context, local market availabilities and cultural preferences of the affected population as per SPHERE Standard 6.2 Food Security and Nutrition.
3	Beneficiaries: Number, selection criteria, registration	230 families of 5 members (1,150 people in total) will receive hygiene kits to alleviate their needs for a week. Assistance will be provided to families whose community was affected by the adverse phenomenon, with special attention to the elderly, single mothers and people who are disabled or belong to vulnerable groups.
4	Intervention objective and indicators	Facilitate access to food for 230 families (1,150 people) affected to ensure their well-being, dignity and health for one month (Indicator F1).
5	Human resources required for the intervention	Individuals will be needed to perform needs assessment reports, budgeting and purchasing, as well as packing tasks in our warehouse. People will also be needed to support and assist during distribution at the selected site. Some of these human resources will be provided through our volunteers and others will be hired only for the days needed for the intervention. For this type of intervention it is estimated that at least 10 people from the ADRA Honduras team will be directly involved in the implementation of the project. On the other hand, it is estimated that at least 20 volunteers will support the activities of delivery, packaging, storage and distribution of humanitarian aid.
6	Identify steps to be taken to ensure market functionality	ADRA will conduct a market analysis using the tools in the NEMP Response Scenario Cash Transfer Guidance for NEMP Response Scenarios developed by the ADRA Network's CASH TLL.
7	Packaging & warehousing arrangements	A list of all beneficiaries with their full name and identification number will be provided in advance. This information will be used to determine the exact quantity for purchase, as well as packaging and loading. Items will be packed in sturdy bags or boxes made of eco-friendly materials (with the ADRA logo on the inside so that they are visible). We will hire workers to assist in this process, as well as use volunteers to expedite packing at ADRA's warehouse in Tegucigalpa.
8	Transport arrangements	ADRA Honduras will drive 3 4x4 vans to distribute these goods to the target areas. The goods will be delivered in small quantities in each area to avoid having a massive number of people in the same place at the same time to avoid disorder and damage. The goods will be covered to protect them from rain and to avoid attracting people's attention when driving through the neighborhoods. To maintain order, only those persons whose names are on the list will be attended to and assisted personally.

National Emergency Management Plan: ADRA [Country].

5. Preparedness Check List

Human Resources	
☑	First aid kits are available for staff in all vehicles and offices
☑	A communications plan is in place in line with the ADRA Crisis Communications Handbook
☑	Communication equipment is operationally ready (e.g. satellite phone, radios, etc.), regularly checked and in good working state (spare batteries are stored).
☑	A complete and up-to-date list of all staff contact information is readily accessible and has been communicated to all office staff
☑	The Emergency Response Coordinator and all members of the National ERT have access to ENET and know their passwords.
☑	All standard HR forms are backed up on an external hard drive or USB, or accessible via cloud storage
The following items will be achieved if an office is compliant with AAL requirements (No need to submit further documentation.)	
1	An Emergency Response Team structure is in place (including sector and functional specialists)
2	Key Contact List (internal and external) are available and updated (Government bodies, UN bodies, partner NGOs, etc.)
3	A safety and security plan is in place
4	All staff and volunteers are trained and insured (AD & D) (include insurance certificate as an appendix)
5	Volunteers receive role descriptions and a written document (translated in their language) clearly outlining their role and compensation mechanisms (including office policy document as an appendix)
6	HR and Staff Care Policies for Emergency Response are in place
7	The Red Cross Code of Conduct has been signed by the country office (include copy in appendix)
8	Members of the National Emergency Response Team have received training on & will apply accountability standards, among which: - Core Humanitarian Standards - The Sphere Project - The Good Enough Guide - Protection (including children protection)
9	All employees have signed the "ADRA Code of Ethics for Employees and Related Personnel" and received a copy of the "ADRA Protection Policy: including Gender-Based Violence & Sexual Exploitation & Abuse".
10	NFIs/relief supplies pre-positioned or agreements with suppliers are in place
11	It is known and agreed as to which offices will fund, and how much, an Initial NEMP Response (Division/Union/Conference, Regional & International)
12	Program and Project staff understand and are able to apply ADRA's Emergency Management Policies & Procedures
13	Members of the National Emergency Response Team have received training on international humanitarian laws
14	Rapid assessment tools are available & rapid assessment team trained
